Description:

Hi,

I have been running in random errors with AMC 1.3.0 (for instance : "ERROR(): No layout for ID +0/0/0+") a few times lately. Each time, It was related to a full /tmp folder:

<pre>
$df
...
tmpfs 1917532 1917532 0 100% /tmp
...
</pre>

It would be great if AMC could check the available space and act accordingly.
Otherwise, everything is working well. Congratulation, it is a very nice piece of software !
