<b>Description:</b>	<p>Dear sir,</p> <p>How can I write Multiple choice questions in the following format</p> <p>***</p> <p>Question 1: What is the largest country in the globe?</p> <p>A) China B) Russia C) USA D Canada</p> <p>*****</p> <p>As you can see the choices are in alphabetic order and no boxes appear. Further, every choice is in a single row similar to itemize environment in Latex.</p> <p>Thanks for your kind help.</p> <p>I am using automultiplechoice as a style file in the source tex file.</p> <p>Best jaafar</p>

Why don't you want boxes to appear?

**08/03/2017 02:38 pm - jaafar almutawa**

thanks for your reply. No problem but how can I type the alphabet inside the boxes. Further is it possible to keep only 2 questions in each sheet. That is if I have 10 questions then I wish to have 5 sheets for each student.

> how can I type the alphabet inside the boxes

You can use the insidebox package option

> Further is it possible to keep only 2 questions in each sheet.

Maybe you can put your questions in a group with mode @cyclic@, shuffle it once, and then insert questions 2 by 2?

<pre>

```
\setgroupmode{mygroup}{cyclic}
```

...

```
\shufflegroup{mygroup}
```

```
\insertgroup[2]{mygroup}
```

```
\clearpage
\insertgroup[2]{mygroup}
\clearpage
\insertgroup[2]{mygroup}
\clearpage
\insertgroup[2]{mygroup}
\clearpage
\insertgroup[2]{mygroup}
</pre>
```

Hi @Alexis!

My question is related to this topic so it is better not to open new issue.

I have 4 groups (g1,g2,g3,g4) and I want to take from each group one question per examGroup.

That is:

One exam group (for my students, examGroup A) contains:

- first question from q1
- first question from q2
- first question from q3
- first question from q4

Then, next group (for my students, examGroup B) contains:

- second question from q1
- second question from q2
- second question from q3
- second question from q4

and further.

Please, can you provide instructions how to realize this scenario?

Thank you,

M

I would say the forums are a better place for your question, especially as this feature request is closed.
