From your source code, it appears that the @tabu@ package breaks AMC working. Try to replace @tabu@ environments with @tabular@ ones.

01/08/2013 11:39 am - red sea

ok, i used tabu package for colored the table (line) with white color :

```
<pre>
\taburulecolor{white}
</pre>
```

can you tel me how i can do it by tabular packege?

regards

01/08/2013 11:45 am - Alexis Bienvenüe

If you need to remove lines, use

```
\begin{tabular}{rrr}
```

instead of

```
\begin{tabular}{|r|r|r|}
```

and don't use @\hline@

thanks

and i got this slove:

```
<pre>
%table color
```

```
\usepackage{colortbl}
\arrayrulecolor{white}
\def\widehline{\noalign{\global\dimen1 \arrayrulewidth
\global\arrayrulewidth1\arrayrulewidth}\hline
\noalign{\global\arrayrulewidth\dimen1 }}
%table color
</pre>
```

i used a post correct form with 100 questions.

i used 30 ~ 60 questions, but when i exported to ods file, i got all questions in 100 columns.

how i can export the questions which i used, not all questions?

01/09/2013 05:36 pm - red sea

i hope add it to export ods options : export teacher choices only.
