

Auto Multiple Choice - Bug # 117: DOC-subject.pdf not DOC-sujet.pdf

Status:	WontFix	Priority:	Normal
Author:	red sea	Category:	
Created:	01/10/2013	Assignee:	
Updated:	01/16/2013	Due date:	
Description:	1- AMC making pdf file with this name : DOC-sujet.pdf (without b). but in the document files and in command line wrote it DOC-subject.pdf (with b). regards 2- in the command line : <pre><pre> auto-multiple-choice export --data ./data \ --module ods \ --fich-noms students-list.csv \ --o output-note.ods </pre></pre> this export ods to the main folder, but the right choice is : http://project.auto-multiple-choice.net/projects/auto-multiple-choice/wiki/Using_AMC_in_command_line_only?version=11 <pre><pre> auto-multiple-choice export --data ./data \ --module ods \ --fich-noms students-list.csv \ --o ./exports/output-note.ods </pre></pre> to export ods to exports folder.		

History

- Status changed from New to WontFix

AMC gui uses @DOC-sujet.pdf@ for the subject file, but you can use whatever name you want when using @auto-multiple-choice@ commands.

There is no 'right choice'. AMC gui stores the exported files in the @export@ subdirectory, but the @auto-multiple-choice@ command user can make another choice...
