Auto Multiple Choice - Feature # 12: Write source without LaTeX knowledge

Status:	Closed	**Priority:**	Normal
Author:	Alexis Bienvenüe	**Category:**	
Created:	03/01/2012	**Assignee:**	
Updated:	03/28/2012	**Due date:**	

Description:	Create some filter to allow non-LaTeX speakers to create exam subjects. This means less freedom to do exactly what you need than with LaTeX, but it is easier for a lot of people. Users who need more control should be allowed to continue writing subjects with LaTeX, of course... The subject source "code" could look like that: <pre> Title: AMC exam * Question text + correct answer - wrong answer 1 - wrong answer 2 </pre> There should also be some syntax to give scoring strategy and some other layout parameters.

- Status changed from New to In Progress

Implemented since r899 - the result may vary a little until 1.1.0 is out.

I'm afraid I won't implement this soon, so I open a different feature request for this point (see #17).
