You can already get something quite similar (without colored rectangles) if you check the `_Stats table_ checkbox` in `_Reports/Marks export_` (with ODS export).

yes, i now.

i hope you adding a pdf report with ods file, because the ods not easily to print.

regards,

Maybe putting the question stats in a vertical flow instead a horizontal one and insert a page break after so many rows would come quite close, certainly if you export that to pdf.

The current horizontal flow in the stats table page is also less usable to do any other processing like consolidate stuff into a database for several exam generations.
