

Auto Multiple Choice - Feature # 185: Local (re)definition of AMCchoiceLabel

Status:	New	Priority:	Normal
Author:	Alexis Bienvenüe	Category:

Updated:	01/13/2016	Due date:	
Description:	<p>@AMCchoiceLabel@ can currently only be redefined globally (for _all_ questions). This should be possible to redefine it only for one or several questions. Note that using the @\correctchoice[X]{answer}@ form is not a workaround, since (for example) digits are associated to a single answer, and not always (when the answers are shuffled) 1 for the first one, 2 for the second...</p>
