

Auto Multiple Choice - Feature # 194: Student Code in vertical columns alignments

Status:	Closed	Priority:	Normal
Author:	Nikola Z. Guscic	Category:	AMC-TXT
Created:	07/25/2013	Assignee:	Alexis Bienvenüe
Updated:	08/19/2014	Due date:	
Description:	For exams created using AMC-TXT it would be nice to have control of Student Code alignment, whether we want to have the numbers arranged in horizontal rows or vertical columns. At this time student code is automatically arranged in horizontal rows without the way to change that. For example one could have an extra option @CodeV:1@.

Test option `_CodeDigitsDirection_` (set it to `@vertical@` or `@horizontal@`) from revision r1391.

07/27/2013 03:39 pm - Nikola Z. Guscic

Working with revision 1.2.1394-5 when I try to specify option 'CodeDigitsDirection:vertical' I get the following error message:

```
@AMC-TXT(Line 10) Unknown option: CodeDigitsDirection@
```

07/27/2013 03:45 pm - Nikola Z. Guscic

Wait, i am sorry, it's a wrong version of AMC, I was using 1.2.1388-5 from Ubuntu testing ppa.

07/30/2013 12:41 pm - Nikola Z. Guscic

I've updated to the latest version 1.2.1394-5 and played with it for the last couple of days. `@CodeDigitsDirection@` option works well and I haven't noticed any regressions. I've tried various settings of the answer sheet and added many additional elements to it using `@LaTeX@` code. Student code was always properly positioned and spaced relative to other elements.

Thank you for implementing this so quickly!
