

Auto Multiple Choice - Bug # 216: Void information message window after automatic data capture

Status:	Closed	Priority:	Normal
Author:	Roberto González	Category:	Translation
Created:	09/29/2013	Assignee:	
Updated:	09/29/2013	Due date:	
Description:	<p>I'm using AMC 1.2.1 on OpenSUSE 12.2 (32 bits), within VirtualBox.</p> <p>Immediately after the automatic data capture is done, a window with no message inside is shown (only a checkbox asking if the window is to be displayed again).</p> <p>See the attached screenshot.</p>

It's probably a problem with spanish translations. Can you replace `@/usr/share/locale/es/LC_MESSAGES/auto-multiple-choice.mo@` with attached version and see if this is better?

I have done what you said, and now the message box is not empty (and I see that the displayed information was not a simple 'Data capture successfully completed'). You can see the message in the attached screenshot.

Should it work with an Ubuntu 12.04 installation too, or is the file specifically for OpenSUSE?

Thanks a lot.

> Should it work with an Ubuntu 12.04 installation too, or is the file specifically for OpenSUSE?

It is the same file for all distributions (but not for all AMC versions).
