- File red-and-black-zooms.png added

- Status changed from New to Resolved

!>red-and-black-zooms.png! Added since revision r951:

* the user can choose the color of the boxes (see documentation)

* red can be deleted from the scans before data capture (Option in Edit/Preferences/Scan). In the following image, you can see that boxes and letters in red, and even red writings, are fully erased (null darkness value).
