- Status changed from New to Feedback

I'm not a professional. I thought this line can be useful to know where is the source file, and be able to read/edit it with other software than the AMC configured editor. However, if everybody agrees to say that this line is useless, I will remove it. So I'm waiting for advices from other users.

"I thought this line can be useful to know where is the source file"

sir..

we can know that by one click on (edit source file) button.
