- Description changed from I use lyx, which makes some things hard to track down. I had to export to latex to figure this one out.

I have some input files with the questions. I get page 1 blank except for marks when the tex looks like this:

```
\usepackage[box,separateanswersheet,automarks]{automultiplechoice}
\begin{document}
\noindent \input{../Exam2/Exam2Questions1.tex}
\onecopy{1}{
\input{../Exam2TitlepageRev1.tex}
```

If I remove the \noindent before the \input, the blank page and marks go away.

to I use lyx, which makes some things hard to track down. I had to export to latex to figure this one out.

I have some input files with the questions. I get page 1 blank except for marks when the tex looks like this:

```
<pre>
\usepackage[box,separateanswersheet,automarks]{automultiplechoice}
\begin{document}
\noindent \input{../Exam2/Exam2Questions1.tex}
\onecopy{1}{
\input{../Exam2TitlepageRev1.tex}
</pre>
```

If I remove the \noindent before the \input, the blank page and marks go away.

Can you provide a minimal source file, along with a minimal @Exam2Questions1.tex@ and @Exam2TitlepageRev1.tex@ that show the problem?

03/10/2014 05:17 pm - David Dixon

- File NoindentBug.zip added

In the zip file find NoindentBug.tex and WithoutBug.tex. NoindentBug has the \noindent with \input, WithoutBut does not.

03/17/2014 01:53 pm - Alexis Bienvenüe

Thanks. It seems that it comes from the @\vspace{-12bp}@ command at the beginning of the @Exam2/Exam2Questions1.tex@ file: it should be placed before the @\noindent@ (or elsewhere).
