

Auto Multiple Choice - Bug # 267: settings dialog appears broken

Status:	Closed	Priority:	Normal
Author:	Pieter Van den Hombergh	Category:	Graphical Interface
Created:	05/01/2014	Assignee:	Alexis Bienvenüe
Updated:	08/19/2014	Due date:	
Description:	<p>When I try to use the AMC-Prefreneces dialog, the Ok and cancel button do not react, nor are any changes saved. Only (window) close button seems to work.</p> <p>Installation on Ubuntu 14.04 from mercurial repo</p> <pre><pre>parent: 1441:de31cb0c0255 tip Update obsolete VCS-* paths branch: default </pre></pre> <p>I started from the commandline, which gives the following extra information:</p> <pre><pre>*** unhandled exception in callback: *** Can't call method "set_sensitive" on an undefined value at /usr/lib/AMC/perl/AMC-gui.pl line 4391. *** ignoring at /usr/lib/AMC/perl/AMC-gui.pl line 6867. </pre></pre>		

History

05/01/2014 03:13 pm - Pieter Van den Hombergh

The svn version (update says version 1522) has the same problem.
Might be a ubuntu 14.04 issue.

05/01/2014 03:14 pm - Pieter Van den Hombergh

Problem is gone when installing libgtk2-notify-perl.
Maybe add to dependency list.

05/01/2014 03:47 pm - Alexis Bienvenüe

- % Done changed from 0 to 100

- Status changed from New to Resolved

The bug was only showing when @Gtk2::Notify@ was not available. This is corrected in commit:7cab3ef53a38.
However, since the desktop notifications are useful, I think we can consider adding the @libgtk2-notify-perl@ dependency.
