

## Auto Multiple Choice - Bug # 267: settings dialog appears broken

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Pieter Van den Hombergh	<b>Category:</b>	Graphical Interface
<b>Created:</b>	05/01/2014	<b>Assignee:</b>	Alexis Bienvenüe
<b>Updated:</b>	08/19/2014	<b>Due date:</b>	
<b>Description:</b>	When I try to use the AMC-Prefrences dialog, the Ok and cancel button do not react, nor are any changes saved. Only (window) close button seems to work.  Installation on Ubuntu 14.04 from mercurial repo <pre> parent: 1441:de31cb0c0255 tip Update obsolete VCS-* paths branch: default </pre> I started from the commandline, which gives the following extra information: <pre>  *** unhandled exception in callback: *** Can't call method "set_sensitive" on an undefined value at /usr/lib/AMC/perl/AMC-gui.pl line 4391. *** ignoring at /usr/lib/AMC/perl/AMC-gui.pl line 6867. </pre>		

### History

#### 05/01/2014 03:13 pm - Pieter Van den Hombergh

The svn version (update says version 1522) has the same problem.

Might be a ubuntu 14.04 issue.

#### 05/01/2014 03:14 pm - Pieter Van den Hombergh

Problem is gone when installing libgtk2-notify-perl.

Maybe add to dependency list.

#### 05/01/2014 03:47 pm - Alexis Bienvenüe

- % Done changed from 0 to 100

- Status changed from New to Resolved

The bug was only showing when @Gtk2::Notify@ was not available. This is corrected in commit:7cab3ef53a38.

However, since the desktop notifications are useful, I think we can consider adding the @libgtk2-notify-perl@ dependency.

#### 08/19/2014 06:09 am - Anirvan Sarkar

- Target version set to 1.3.0
