

Auto Multiple Choice - Bug # 294: Tooltip of 'associated' checkbox in Manual association window is misleading

Status:	Closed	Priority:	Normal
Author:	Anirvan Sarkar	Category:	Graphical Interface
Created:	08/02/2014	Assignee:	Anirvan Sarkar
Updated:	08/19/2014	Due date:	
Description:	Unlike what is mentioned in its tooltip, ticking and unticking the 'associated' checkbox in the Manual association window does not change the list of associated and non-associated papers in the GtkTreeView below it.		

History

The purpose of this box is the following: when clicking on a name to associate a copy to a student, the GUI goes to the next copy. Here, when the `_associated_` checkbox is not ticked, the next copy is taken from the copies which are not yet associated (already associated copies are skipped), and when it is checked, the next copy is taken from all the copies (you pass all associated and non-associated copies in turn).
I tried this feature and it seems to work. Maybe the tooltip text is not clear enough? If this is the case, can you propose another wording?

08/18/2014 04:17 pm - Anirvan Sarkar

- Target version set to 1.3.0

- Subject changed from 'associated' checkbox in Manual association window does not work to *Tooltip of 'associated' checkbox in Manual association window is misleading*

- Assignee set to Anirvan Sarkar

The previous tooltip was a little misleading. This seems suitable as a tooltip message. I will update the repo to use this. As for as its functionality it is working as intended.
