

Auto Multiple Choice - Bug # 305: \AMCbeginQuestion ignores pagebreak

Status:	Closed	Priority:	Normal
Author:	David Dixon	Category:	
Created:	08/31/2014	Assignee:	
Updated:	08/31/2014	Due date:	
Description:	<p>While I try to figure out how to use AMC with beamer, I'm attempting to duplicate its functionality using article by printing landscape and putting one question on each page. I thought I could do this with</p> <pre>\def\AMCbeginQuestion#1#2{\pagebreak{\Huge{Question #1}}\vspace*{10mm}}</pre> <p>but \AMCbeginQuestion ignores \pagebreak, \newpage{}, \AMCcleardoublepage, and \clearpage.</p> <p>I also tried adjusting inter-question spacing, but \AMCinterlquest and \AMCinterBquest seem to be ignored, also.</p> <p>Ubuntu 14.04, AMC 1.2.1 (svn:1403)</p>

Do you use the @box@ (or @bloc@) package option? This encloses questions inside @parbox@'es, so that @\pagebreak@ can't be used there. If so, please try without this option.

08/31/2014 07:13 pm - David Dixon

Removing box from the package options fixes it for \newpage (and I suppose that box is unnecessary with \newpage) so thanks!

However, removing box also causes the (previously ignored) \AMCinterlquest to throw a "Use of \AMCinterlquest doesn't match its definition" exception.

Okay, I see my error - I was using \def\AMCinterlquest and shouldn't have. Sorry.
