The changeset doesn't change all © dates to 2015. There are changes to 2013, 2014 or 2015. Is it desired?

For each file, I picked the last change year.

I don't know if it is the proper way to handle copyrights... Any clue?

I do not think it is needed at that level. Same as cars: The pistons (design wise) used are probably from 1867, but the newest car model could still have model year 2015.

It is about the whole program, not about the constituent parts.

You should not change the file (kick its version number) just for sake of copyright year and have no changes.

I think this copyright year thingy should stay with documentation of the whole product only.
