a user name and password for one user is good but!

Preferably multiUsers at three levels:

- Read-only

- Read and write.

- Read ,write and edit the users accounts (admin).

03/29/2012 09:08 pm - Alexis Bienvenüe

This can be set on unix/linux platforms creating several users, no?

04/03/2012 03:12 pm - Alexis Bienvenüe

- Status changed from New to WontFix
