Auto Multiple Choice - Bug # 38: Stats table cannot be exported in Japanese locale

Status:	Closed	Priority:	Normal
Author:	Hiroto Kagotani	Category:	
Created:	04/01/2012	Assignee:	
Updated:	04/01/2012	Due date:	

Description:	I updated ja.po for exporting statistics table and found "Export" button does not write any file when I ticked "Stats table" box in Japanese locale.

Launching AMC-export.pl by hand using xml argument file remained in /tmp, I got the following message:

```
$ LC_ALL=ja_JP.UTF-8 /usr/bin/perl /usr/local/lib/AMC/AMC-export.pl --xmlargs
/tmp/AMC-PACK-OCnwh5oW.xml
Cannot decode string with wide characters at /usr/local/lib/perl5/5.12.4/mach/Encode.pm line 174.
```

In my perl installation (on FreeBSD 8.1), line 174 of Encode.pm calls $enc->decode() in sub decode().

```
164: sub decode($$;$) {
165:    my ( $name, $octets, $check ) = @_;
166:    return undef unless defined $octets;
167:    $octets .= '' if ref $octets;
168:    $check ||= 0;
169:    my $enc = find_encoding($name);
170:    unless ( defined $enc ) {
171:        require Carp;
172:        Carp::croak("Unknown encoding '$name'");
173:    }
174:    my $string = $enc->decode( $octets, $check );
175:    $_[1] = $octets if $check and !ref $check and !( $check & LEAVE_SRC() );
176:    return $string;
177: }
```

Please let me know if you need any other information.

History

- % Done changed from 0 to 100

- Status changed from New to Resolved

Applied in changeset r979.

04/01/2012 02:55 pm - Alexis Bienvenüe

Yes, sorry: I forgot a @encode('utf-8',...)@ when passing an argument to a OpenOffice::OODoc function. I should be ok now (revision r979).
