

Auto Multiple Choice - Bug # 386: indivanswers

Status:	Closed	Priority:	Normal
Author:	math user	Category:	
Created:	10/27/2015	Assignee:	
Updated:	10/30/2015	Due date:	
Description:	When I set the option indivanswers (and separateanswersheet), I just get the solutions for the first student. According to the documentation I should get the solution for ALL students, correct? (Great idea - simplifies testing!)		

History

10/29/2015 10:50 am - Alexis Bienvenüe

If you build the corrected document with AMC gui, you will always get a single-student solution. This document is intended to be given to the students. If you compile your source file using @pdflatex@ (or similar), you should get the solution for all students.

10/29/2015 12:02 pm - Alexis Bienvenüe

- Target version set to 1.3.0

Starting with commit commit:9f2924582025, you can also build an individual solution from the GUI if you requested so in the global preferences.

Thanks for your help, Alexis!

@pdflatex@ is fine for me.

I just leave @indivanswers@ in the source file and compile it with AMC for the students / printing and with @pdflatex@ for me to check the different numbers.
