Auto Multiple Choice - Bug # 400: Installation problems on opensuse

Status:	Closed	**Priority:**	High
Author:	Sa-aadat Parker	**Category:**	Installation
Created:	12/18/2015	**Assignee:**	
Updated:	04/15/2017	**Due date:**	
Description:	I cannot get AMC to install on Opensuse 42.1. Below is the the Opensuse complaint, I can't seem to get the Perl version 5.20 installed. It is stuck in Perl 5.18 Problem: nothing provides perl(:MODULE_COMPAT_5.20.1) needed by auto-multiple-choice-1.2.1-105.1.x86_64. Is there anyway to fix this?

How did you try to install AMC? Packages from OpenSUSE build service are not maintained, and can be broken: maybe some dependencies has to be updated for example. You can register on build.opensuse.org and try to correct that and build AMC for your OpenSUSE version, or try to compile on your computer from the sources (1.2.1 precompiled or development repository). Ask for advice while making progress on that.
