Auto Multiple Choice - Bug # 424: Change (N) definition for annotated pdfs

Status:	WontFix	**Priority:**	Normal
Author:	Rafael Rodriguez	**Category:**	
Created:	09/03/2016	**Assignee:**	
Updated:	02/08/2021	**Due date:**	
Description:	Version 1.3.0. Annotate.pm line 273 is $ex=sprintf("%04d:%04d",@$student); I suggest to change the : character. The problem is that windows does not accept it as a valid character for filenames making impossible to backup the annotated pdf files to a windows system.
