- Priority changed from Immediate to Low

I agree this could be an interesting way to handle the multiple-pages separate answer sheet photocopied exam case. However, this needs to change the way AMC is currently working, so I'm afraid this won't be done in a near future.

12/05/2016 11:43 am - Yogesh Chaudhari

Is there any way to handle this multiple-pages of separate answer sheet in photocopied exam case?

12/05/2016 11:49 am - Alexis Bienvenüe

Currently no.

04/12/2017 07:45 pm - Alexis Bienvenüe

This cases enters the development version of AMC. You must use the @multi@ option with the same code name on all pages with student input, like

```
\AMCcodeGrid[multi]{studentid}{8}
```

During the automatic data capture, one different copy number is allocated for each page, but a __gather__ button allows to gather pages with the same @studentid@, setting the same copy number back for these pages.

This is only available for LaTeX source files at present.
