| <b>Description:</b> | As per ( <a href="http://project.auto-multiple-choice.net/boards/2/topics/1299">http://project.auto-multiple-choice.net/boards/2/topics/1299</a> ), it would be great if AMC extracts AMCOpen's areas to images. Same applies for \tracebox's boxes other than the ones named `nom`. |                  |      |
