

Auto Multiple Choice - Feature # 464: Alarm message for doubly assigned exams

Status:	Closed	Priority:	Normal

Description:	Hi Alexis, unfortunately, we experienced the incident that an exam was mistakenly printed twice. So, two different students wrote the same exam (same number, identifier etc.). When analyzing the exams, AMC did not give any error message that an exam number was doubly assigned. It just gave the results of one of the two and did not mention the other. I hope that such a message could be easily implemented. This could serve as useful quality control check. Thanks and regards Matthias

That's a good idea (see also message#5866). I tried to code something usefull with revision commit:7b65a2d568f7, now included in the "test PPA":<https://launchpad.net/~alexis.bienvenue/+archive/ubuntu/test>. Please test!

Hi Alexis,

it works just fine, thanks!
