Updated:	03/06/2018	Due date:	
Description:	<p>Hi !</p> <p>We have a problem regarding annotate command on our server.</p> <p>When attempting to launch the annotate command we have the following error :</p> <p>Gtk-WARNING **: cannot open display: at /usr/lib/x86_64-linux-gnu/perl5/5.24/Gtk2.pm line 126.</p> <p>So in /sur/share/perl5/AMC/Annotate.pm code whe did this :</p> <pre>package AMC::Annotate;</pre> <pre># do not use -init ?</pre> <pre>#use Gtk2 -init;</pre> <pre>use Gtk2;</pre> <p>And this seems to work in our use case.</p> <p>Is this a solution or will it have side/unwanted effects on other use cases ?</p> <p>Thanks</p>
