<b>Description:</b>	Hi,  I have been running in random errors with AMC 1.3.0 (for instance : "ERROR(): No layout for ID +0/0/0+") a few times lately. Each time, It was related to a full /tmp folder:  <pre> \$df ... tmpfs          1917532 1917532    0 100% /tmp ... </pre>  It would be great if AMC could check the available space and act accordingly. Otherwise, everything is working well. Congratulation, it is a very nice piece of software !
