Description:	Although AMC is categorized in OMR (optical mark recognition) software, and in fact it is listed in OMR entry of Wikipedia (http://en.wikipedia.org/wiki/Optical_mark_recognition), the website and documentation do not include the terminology OMR. People who are searching for OMR software naturally use "OMR" as the keyword, so the website and documentation should use OMR (or optical mark recognition) to describe the feature of AMC. It would greatly help people searching for free or open-source OMR software.
