

Auto Multiple Choice - Bug # 552: AMC-mailing.pl dies for non-ascii user names

Status:	Closed	Priority:	Normal
Author:	Hiroto Kagotani	Category:	
Created:	04/10/2018	Assignee:	
Updated:	05/10/2018	Due date:	
Description:	My student list contains full of non-ascii names. Since the default file names of annotated answer sheets are like (id)-(name).pdf, AMC-mailing.pl dies with the message: <pre> Wide character in subroutine entry at /usr/local/lib/AMC/perl/AMC-mailing.pl line 239. </pre> If the annotated answer sheet file names can contain non-ascii characters, AMC-mailing.pl also can handle them without problem, can't it? Thank you.

Thanks.

The fix worked well.
