

Auto Multiple Choice - Bug # 562: AMC not available anymore in Ubuntu

Status:	Closed	Priority:	Normal
Author:	Pierre-Antoine Champin	Category:	
Created:	05/14/2018	Assignee:	
Updated:	02/08/2021	Due date:	
Description:	I just updated to Ubuntu 18.04 (bionic), and the package auto-multiple-choice is not anymore in the default repositories. The website mentions a PPA, which I tried to use, but the last version supported by the PPA is xenial, with outdated dependencies. Is there any plan to support recent versions of Ubuntu?

Just the one I hadn't tried... :)

It works. Thanks!
