Updated:	09/21/2021	**Due date:**	
Description:	A system upgrade recently installed Version 1.4 over 1.3 on my debian sid system. Afer that, I tried to reuse a Test, I built a year ago with 1.3. All went smooth until I tried to correct it. Now I have a bunch of written tests with wrongly classified answers, wrong grades and incorrect corrections. The complete directories for both tests are available in my box: https://app.box.com/s/8jaded3p6p11vs1g7yqulfu58lhpws2n
