

## Auto Multiple Choice - Bug # 600: Installation sur Mac (sierra 10.13.6)

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	julien schneider	<b>Category:</b>	Installation
<b>Created:</b>	10/14/2018	<b>Assignee:</b>	
<b>Updated:</b>	02/08/2021	<b>Due date:</b>	
<b>Description:</b>	Bonjour, je ne parviens pas à installer AMC sur mon mac. Il ne fonctionnait plus, je l'ai désinstallé et impossible pour moi de le réinstaller. J'ai tapé sudo port install auto-multiple-choice-devel dans le terminal. Merci de votre aide		

### History

#### 10/14/2018 05:30 pm - Alexis Bienvenüe

> J'ai tapé sudo port install auto-multiple-choice-devel dans le terminal.

Et que vous a renvoyé cette commande ?

#### 10/14/2018 05:31 pm - julien schneider

J'ai le message suivant :

```
-bash: /usr/local/bin/auto-multiple-choice: No such file or directory
```

#### 10/14/2018 05:35 pm - julien schneider

```
<pre>
```

**10/14/2018 05:49 pm - julien schneider**

C'est ce que vous me demandiez ?

Merci de votre aide.

**10/15/2018 09:11 am - julien schneider**

Bonjour,

j'imagine que ma question et les informations que j'ai fournies sont trop vagues pour que vous puissiez m'aider. J'ai désinstallé AMC, car il ne parvenait pas à reconnaître les scans des copies remplies. Cela fonctionnait parfaitement il y a un an. J'essaye de l'installer à nouveau en utilisant MacPorts. Je n'y parviens pas. J'ai pourtant suivi la doc (les différentes polices demandées placées dans \Library\Fonts), Xcode à jour etc. J'ai aussi testé avec Homebrew. L'installation avait l'air de fonctionner, mais j'avais des messages du type police Linux Libertine non installée, auto-multiple-choice.sty introuvable etc.

Bref, je ne m'en sors pas et mes connaissances info sont plus que limitées.

**10/15/2018 11:18 am - julien schneider**

- *File amc-compiled.log added*

J'ai retenté une installation avec Homebrew. Quand je compile, cela ne fonctionne pas.

**10/15/2018 11:47 am - Alexis Bienvenüe**

> cela ne fonctionne pas.

Qu'est-ce qui ne fonctionne pas exactement ?

**10/15/2018 12:26 pm - julien schneider**

Bonjour, je ne suis pas chez moi. De mémoire, quand je lance amc, il me dit qu'il y a incompatibilité entre latex et amc. Je tente malgré tout de compiler. Il m'indique plusieurs erreurs et aucun sujet ne s'affiche. J'ai utilisé le modèle de qcm fourni.

Merci pour votre aide

**10/15/2018 12:49 pm - Maël Valais**

Bonjour Julien,

Je regarde le log Homebrew cet après-midi.

Possible de faire un screenshot de l'erreur ou d'envoyer le log d'@amc (il faut l'activer dans le menu d'@amc). Je pense que ça vient de la « post-installation » nécessaire de automultiplechoice.sty quand on utilise Homebrew. En gros ça se résume à faire, après avoir installé :

```
<pre>
sudo auto-multiple-choice latex-link remove
sudo auto-multiple-choice latex-link
</pre>
```

**10/15/2018 05:02 pm - julien schneider**

- *File Capture\_d\_\_\_\_\_cran\_2018-10-15\_\_\_\_\_17.01.11.png added*

Bonjour,

merci de votre réponse. Je viens de tester mais cela ne fonctionne pas. Je vous joins une capture d'écran.

**10/15/2018 05:04 pm - Alexis Bienvenüe**

- *Status changed from New to Feedback*

Il semble que vous utilisez un fichier @automultiplechoice.sty@ dans le répertoire du projet, qui n'est pas de la bonne version. Si vous ne l'avez pas modifié par vous-même, supprimez-le du répertoire projet et laissez LaTeX utiliser celui fourni par l'installation d'AMC.

**10/16/2018 04:54 pm - julien schneider**

- *File amc-compiled.log added*

Merci pour vos réponses. Je n'ai plus le message cité précédemment une fois que j'ai supprimé les fichiers auto-multiple-choice.sty. Malheureusement, j'ai toujours des erreurs en compilant et impossible d'obtenir les sujets au format pdf...

**10/16/2018 04:55 pm - julien schneider**

- *File amc-compiled.log added*

Merci pour vos réponses. Je n'ai plus le message cité précédemment une fois que j'ai supprimé les fichiers auto-multiple-choice.sty. Malheureusement, j'ai toujours des erreurs en compilant et impossible d'obtenir les sujets au format pdf...

**10/17/2018 07:57 pm - Joël Brogniart**

Avant d'aller plus loin, il faut choisir de travailler soit avec MacPorts soit avec Homebrew. Si vous avez l'habitude de travailler avec des outils unix, il n'y a pas (trop) de problème à utiliser les deux, sinon, pour le commun des mortels c'est ingérable car chacun des deux outils installe de manière différente et à des endroits différents son bazar. Au bout d'un moment on a des programmes installés par l'un lié à des bibliothèques installées par l'autre et selon l'ordre d'installation on ne sait plus trop quel outil fonctionne.

À mon avis, le plus simple est de supprimer les outils MacPorts et les outils Homebrew pour partir d'une situation propre et sans conflit. Ensuite vous choisissez l'outil de gestion que vous préférez et n'utilisez que lui pour installer AMC.

**10/17/2018 08:09 pm - Maël Valais**

Effectivement, le mélange Homebrew et Macports peut se passer très bien mais ça demande un peu de gymnastique. J'adhère avec la remarque de Joël : choisir l'un ou l'autre (sauf si vous maîtrisez/avez du temps).

Concernant le log @amc-compiled.log@, j'ai vu la ligne :

```
<pre>
```

```
(/opt/local/share/texmf-local/tex/latex/automultiplechoice.sty
AMC version: 2018/03/07 v1.3.0+hg2018-03-07 r:bf07b77e8a6d
Package: automultiplechoice 2018/03/07 v1.3.0+hg2018-03-07 r:bf07b77e8a6d
</pre>
```

qui montre que le @automultiplechoice.sty trouvé par @kpsewhich automultiplechoice.sty@ est celui de Macports alors que c'est celui de Homebrew qui devrait être trouvé (homebrew installe dans /usr/local, pas dans /opt/local)

Si vous faites

```
<pre>
ls -l $(kpsewhich --all automultiplechoice.sty)
</pre>
```

vous pourrez "remonter" à la source des liens symboliques menant au @automultiplechoice.sty@ réellement "trouvé"

**10/17/2018 10:46 pm - julien schneider**

Bonsoir,  
merci pour vos réponses. J'ai désinstallé MacPorts ainsi que Homebrew. J'ai ensuite réinstallé Homebrew puis AMC. Quand je le lance, il me conseille de taper auto-multiple-choice latex-link en tant que super-utilisateur, ce que j'ai fait. J'ai droit à un message d'erreur. Quand je compile un document, rien ne se passe. Aucun message d'erreur mais pas de pdf produit.

**10/18/2018 07:19 am - julien schneider**

J'avais supprimé MacTex, c'est peut être l'origine du problème...

**10/18/2018 08:42 am - julien schneider**

- File amc-compiled.log added

12 erreurs quand je compile et aucun pdf produit... je ne m'en sortirai jamais.

**10/19/2018 10:13 am - julien schneider**

Bonjour,  
j'ai enfin trouvé d'où venait le problème. Il fallait que je remplace une ligne dans le fichier auto-multiple-choice.sty :\tl\_to\_lowercase:n par \tex\_lowercase:D  
Merci pour votre aide et l'installation rapide de AMC via Homebrew
