

## Auto Multiple Choice - Bug # 72: Cannot "calculer les mises en page" if more than 5 copies

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Nicolas Pettiaux	<b>Category:</b>	
<b>Created:</b>	09/04/2012	<b>Assignee:</b>	
<b>Updated:</b>	03/08/2013	<b>Due date:</b>	
<b>Description:</b>	<p>With the AMC-TXT input in annex, I can generate as many copies as required, and the LaTeX compilation works, but if I generate more than 5, the "calculer les mises en page" does not work.</p> <p>I use AMC 1.1.0 (svn: 1075) on ubuntu 12.04</p> <p>I get «Aucune mise en page n'a été fabriquée. Ne faites pas passer l'examen avant d'avoir réglé le problème, sinon vous ne pourrez pas utiliser AMC pour la correction.»</p> <p>And the log windows shows</p> <p>Unknown dim: -77645sp at /usr/lib/AMC/perl/AMC-meptex.pl line 75, &lt;SRC&gt; line 3978.</p> <p>* What happens ? * What can I do ?</p> <p>Thanks</p>		

### History

#### 09/04/2012 11:46 am - Alexis Bienvenüe

This bug does not show on my system (even on a fresh virtualbox with lubuntu 12.04 and AMC 1.1.0 from the PPA)...

Can you send me the whole project directory and a log file produced by AMC in debugging mode?

- Status changed from New to Feedback

#### 10/28/2012 02:57 pm - Andrés Alvarado

Workaround: I changed "\documentclass[a4paper]" to "\documentclass[letterpaper]"

-----

Origanally, I got this message:

>Unknown dim: -484817sp at /usr/lib/AMC/perl/AMC-meptex.pl line 75, <SRC> line 78

Then I checked the "DOC-calage.xy", it turns out it had negative numbers.

When I erased the sign of the negative numbers, AMC-meptex.pl did not throw errors, it worked OK.

I assumed that some points might be outside de page because of the page size.

> how do I proceed to put AMC in debugging mode ?  
From menu "Help", choose the entry "debugging".
