Description:	<p>Hi,</p> <p>Would it be possible to post a minimal working example of using AMC from the command line? I cannot get it to work myself from following the documentation (problems with defining "mep" directory, --data switch does not seem to be recognised). I'd like to run it from the command line due to the work-flow I am looking at for a particular project.</p> <p>Thanks,</p> <p>Jonathan.</p>

> problems with defining "mep" directory, --data switch does not seem to be recognised

Hint: the @mep@ subdirectory is not used anymore since version 1.1.0, and the @--data@ switch appeared in version 1.1.0.

Hi Jonathan, I just wrote a Wiki page which should help you: [[Using AMC in command line_only]]
