Which version of AMC and Ubuntu do you use?

10/31/2012 10:30 pm - red sea

ubuntu 12.10
AMC 1197

11/06/2012 06:04 pm - Pieter Van den Hombergh

I have seen something similar, probable also in 1197, but have since moved to a higher AMC subversion version.
Since then I cannot reproduce this problem any more.
I am using 12.04.1 LTS.

I have also encountered a similar problem but in 1227.

It occurs when I maximise the Page Layout Window after clicking the Check Layouts button.
I had to maximise as the Page Layout Window was small and I could not see the layout.

Before maximising:
!http://i46.tinypic.com/16718q0.png!

After maximising:
!http://i46.tinypic.com/mil2ea.png!

Also I can't use the scroll bars. (There are no scroll bars).

But instead of first maximising the window if I manually drag and resize the window there is no problem in the layout. And now I can also use the scroll bars. (The scroll bar is in orange at the right of the window).

After drag and resize:

I am using Ubuntu 12.10, AMC 1.1.1198 (svn:1227).

- Status changed from New to Feedback

I'm afraid I can't reproduce this bug, but I corrected something that could be related in revision r1229: can you try it and tell me if this changed something for you?

11/21/2012 02:30 pm - Anirvan Sarkar

Thank you.

I have updated AMC and now the image+boxes is being correctly rendered.
