I also have the same problem.

The following message is displayed when clicking on `_Print Papers:`

```
*Printing with method 'CUPS' needs some perl modules that are not installed: Net::CUPS, Net::CUPS::PPD. Please install these modules or switch to another printing method.*
```

If on ubuntu, do you have the package `@libnet-cups-perl@` installed?

11/29/2012 12:55 pm - Anirvan Sarkar

No it is not installed.

11/29/2012 12:56 pm - Alexis Bienvenüe

Can you install it and try again?

11/29/2012 01:02 pm - Anirvan Sarkar

I have installed the package and now I am able to print the papers.

Maybe you should add the `@libnet-cups-perl@` package as a dependency while installing AMC.

Thank you for your quick response.

11/29/2012 01:14 pm - Alexis Bienvenüe

The `@libnet-cups-perl@` package is listed in the `_recommends_` dependencies for AMC debian/ubuntu packages, so that it should be installed together with AMC if you configured your package installer to always install `_recommends_`, which I think is the default behavior.

11/29/2012 04:35 pm - red sea

my problem was not for all AMC projects, my problem in 1 project.

the project work good and i can print with pdf viewer , but not with amc.

and amc got data from scan papers.

i sent the project with email, i don't know what the problem?!

regards

I installed AMC with `@dpkg@` following the instructions in the wiki [\[\[Building AMC from repository\]\]](#). After searching the internet I found

"here":<http://askubuntu.com/questions/20031/do-dpkg-and-apt-get-install-dependencies> that dpkg does not handle dependencies, it's a low level package management tool.

I found the recommended packages of AMC from source:debian/control and I installed them using @apt-get@.

Ok, I see. Let's add something about that in the wiki page you followed...

thank you, the printer can't print the papers when i used "AMCcode=red" because i have w/b laser printer , not a color printer.
