11/29/2012 04:40 pm - red sea

Proposed to make it optional.

12/31/2012 07:34 am - red sea

i made it.

!http://alfaris.net/up/87/alfaris_net_1356935719.png!

this the code:

```
<pre>
\AMCboxDimensions{shape=oval,size=2.2ex,down=1ex}
\begin{tikzpicture}
\begin{pgfonlayer}{background}
\node [fill=black!00] {
\AMCcodeHspace=0.48em\AMCcodeVspace=0.48em\AMCcode{StudentNum}{10}
}; % enough to add two diagonal nodes
\end{pgfonlayer}
\draw[step=0.53cm] (-2.66,-2.651) grid (2.65,3.18);
\end{tikzpicture}
</pre>
```

print and shaded student numbers by calc : [[heeeer]]<http://project.auto-multiple-choice.net/boards/2/topics/621>

12/31/2012 09:36 am - red sea

if you don't have 10 numbers like "4326" or "43" or "686743" ..

you can complete the 10 numbers by put your countries number from :

http://en.wikipedia.org/wiki/List_of_GS1_country_codes

or

http://www.makebarcode.com/specs/ean_cc.html

example1 :

if you are using 4 numbers for the students numbers and you are from saudi arabia ?

EAN number for saudi arabia is = 628

so you can write students numbers like this..

6280004001

6280004002

6280004003

....

example2 :

if you are using 6 numbers for the students numbers and you are from Finland ?

EAN number for Finland is = 64

so you can write students numbers like this..

6400600001

6400600002

6400600003

....
